No. 00434/2.1090/AU.1/04/0153-3/1/III/2019

Pemegang Saham, Dewan Komisaris, dan Direksi

PT Mayora Indah Tbk

Kami telah mengaudit laporan keuangan konsolidasian PT Mayora Indah Tbk dan entitas anaknya terlampir, yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2018, serta laporan laba rugi dan penghasilan komprehensif lain konsolidasian, laporan perubahan ekuitas konsolidasian, dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, dan suatu ikhtisar kebijakan akuntansi signifikan dan informasi penjelasan lainnya.

Tanggung jawab manajemen atas laporan keuangan

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Tanggung jawab auditor

Tanggung jawab kami adalah untuk menyatakan suatu opini atas laporan keuangan konsolidasian tersebut berdasarkan audit kami. Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Standar tersebut mengharuskan kami untuk mematuhi ketentuan etika serta merencanakan dan melaksanakan audit untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian tersebut bebas dari kesalahan penyajian material.

No. 00434/2.1090/AU.1/04/0153-3/1/III/2019

The Stockholders, Board of Commissioners, and Directors
PT Mayora Indah Tbk

We have audited the accompanying consolidated financial statements of PT Mayora Indah Tbk and its subsidiaries, which comprise the consolidated statement of financial position as of December 31, 2018, and the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity, and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of such consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on such consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether such consolidated financial statements are free from material misstatement.

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti tentang angka-angka dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Opini

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian PT Mayora Indah Tbk dan entitas anaknya tanggal 31 Desember 2018, serta kinerja keuangan dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Mayora Indah Tbk and its subsidiaries as of December 31, 2018, and their consolidated financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian untuk tahun yang berakhir pada 31 Desember 2018 adalah konsisten dengan kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian untuk tahun yang berakhir 31 Desember 2017.

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung dengan mengelompokkan arus kas dalam aktivitas operasi, investasi dan pendanaan.

Mata uang yang digunakan dalam penyusunan dan penyajian laporan keuangan konsolidasian adalah mata uang Rupiah (Rupiah) yang juga merupakan mata uang fungsional Perusahaan.

b. Dasar Konsolidasi

Laporan keuangan konsolidasian meliputi laporan keuangan Perusahaan dan entitas anak (Grup). Pengendalian diperoleh apabila Grup memiliki seluruh hal berikut ini:

- kekuasaan atas investee;
- eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan investee: dan
- kemampuan untuk menggunakan kekuasaannya atas investee untuk mempengaruhi jumlah imbal hasil Grup.

Pengkonsolidasian entitas anak dimulai pada saat Grup memperoleh pengendalian atas entitas anak dan berakhir pada saat Grup kehilangan pengendalian atas entitas anak. Secara khusus, penghasilan dan beban entitas anak yang diakuisisi atau dilepaskan selama tahun berjalan termasuk dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal Grup memperoleh pengendalian sampai dengan tanggal Grup kehilangan pengendalian atas entitas anak.

Seluruh aset dan liabilitas, ekuitas, penghasilan, beban dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam Grup dieliminasi secara penuh dalam laporan keuangan konsolidasian.

The accounting policies adopted in the preparation of the consolidated financial statements for the year ended December 31, 2018 are consistent with those adopted in the preparation of the consolidated financial statements for the year ended December 31, 2017.

The consolidated statements of cash flows are prepared using the direct method with classifications of cash flows into operating, investing and financing activities.

The currency used in the preparation and presentation of the consolidated financial statements is the Indonesian Rupiah (Rupiah) which is also the functional currency of the Company.

b. Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries (the Group). Control is achieved when the Group has all the following:

- power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee: and
- the ability to use its power to affect its returns

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group losses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Laba rugi dan setiap komponen penghasilan komprehensif lain diatribusikan kepada pemilik Perusahaan dan kepentingan nonpengendali (KNP) meskipun hal tersebut mengakibatkan KNP memiliki saldo defisit.

KNP disajikan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan dalam ekuitas pada laporan posisi keuangan konsolidasian, terpisah dari bagian yang dapat diatribusikan kepada pemilik Perusahaan.

Transaksi dengan KNP yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas. Selisih antara nilai wajar imbalan yang dialihkan dengan bagian relatif atas nilai tercatat aset bersih entitas anak yang diakuisisi dicatat di ekuitas. Keuntungan atau kerugian dari pelepasan KNP juga dicatat di ekuitas.

c. Penjabaran Mata Uang Asing

Mata Uang Fungsional dan Pelaporan

Akun-akun yang tercakup dalam laporan keuangan setiap entitas dalam Grup diukur menggunakan mata uang dari lingkungan ekonomi utama dimana entitas beroperasi (mata uang fungsional).

Laporan keuangan konsolidasian disajikan dalam Rupiah, yang merupakan mata uang fungsional Perusahaan dan mata uang penyajian Grup.

Transaksi dan Saldo

Transaksi dalam mata uang asing dijabarkan kedalam mata uang fungsional menggunakan kurs pada tanggal transaksi. Keuntungan atau kerugian selisih kurs yang timbul dari penyelesaian transaksi dan dari penjabaran pada kurs akhir tahun atas aset dan liabilitas moneter dalam mata uang asing diakui dalam laba rugi.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controling interest (NCI) even if this results in the NCI having a deficit balance.

NCI is presented in the consolidated statement of profit or loss and other comprehensive income and under the equity section of the consolidated statement of financial position, respectively, separately from the corresponding portion attributable to owners of the Company.

Transactions with NCI that do not result in loss of control are accounted for as equity transactions. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to NCI are also recorded in equity.

c. Foreign Currency Translation

Functional and Reporting Currencies

Items included in the financial statements of each of the Group's companies are measured using the currency of the primary economic environment in which the entity operates (the functional currency).

The consolidated financial statements are presented in Rupiah which is the Company's functional and the Group's presentation currency.

Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

Pada tanggal 31 Desember 2018 dan 2017, kurs konversi yakni kurs tengah Bank Indonesia, yang digunakan oleh Grup adalah sebagai berikut: As of December 31, 2018 and 2017, the conversion rates used by the Group were the middle rates of Bank Indonesia as follows:

	2018	2017	
1 Euro (EUR)	16.560	16.174	1 Euro (EUR)
1 Dolar Amerika Serikat (USD)	14.481	13.548	1 United States Dollar (USD)
1 Dolar Singapura (SGD)	10.603	10.134	1 Singapore Dollar (SGD)
1 Yuan China (CNY)	2.110	2.073	1 Chinese Yuan (CNY)
1 Yen Jepang (JPY)	131	120	1 Japanese Yen (JPY)

Kelompok usaha Grup

Hasil usaha dan posisi keuangan dari kelompok usaha Grup yang memiliki mata uang fungsional yang berbeda dengan mata uang pelaporan, dijabarkan pada mata uang pelaporan sebagai berikut:

- aset dan liabilitas dari setiap laporan posisi keuangan yang disajikan, dijabarkan pada kurs penutup pada tanggal laporan posisi keuangan;
- b. penghasilan dan beban untuk setiap laporan laba rugi dijabarkan menggunakan kurs rata-rata; dan
- seluruh selisih kurs yang timbul diakui dalam komponen ekuitas yang terpisah.

d. Transaksi Pihak Berelasi

Orang atau entitas dikategorikan sebagai pihak berelasi Grup apabila memenuhi definisi pihak berelasi berdasarkan PSAK No. 7, "Pengungkapan Pihak-pihak Berelasi".

Semua transaksi signifikan dengan pihak berelasi telah diungkapkan dalam laporan keuangan konsolidasian.

e. Kas dan Setara Kas

Kas terdiri dari kas dan bank. Setara kas adalah semua investasi yang bersifat jangka pendek dan sangat likuid yang dapat segera dikonversikan menjadi kas dengan jatuh tempo dalam waktu tiga (3) bulan atau kurang sejak tanggal penempatannya, dan yang tidak dijaminkan serta tidak dibatasi pencairannya.

Group's Companies

The results and financial position of all the Group's companies that have a functional currency different from the reporting currency are translated into the reporting currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- income and expenses for each statement of profit and loss are translated at average exchange rates; and
- all resulting exchange differences are recognized as a separate component of equity.

d. Transactions with Related Parties

A person or entity is considered a related party of the Group if it meets the definition of a related party in PSAK No. 7, "Related Party Disclosures".

All significant transactions with related parties are disclosed in the consolidated financial statements.

e. Cash and Cash Equivalents

Cash consists of cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from the date of placements, and which are not used as collateral and are not restricted.

f. Sukuk Mudharabah

Sukuk Mudharabah diakui sebesar nilai nominal dalam laporan posisi keuangan konsolidasian. Biaya transaksi sehubungan dengan penerbitan sukuk diakui sebagai aset secara terpisah pada akun beban tangguhan dalam laporan posisi keuangan konsolidasian dan diamortisasi selama jangka waktu Sukuk Mudharabah. Amortisasi biaya transaksi Sukuk Mudharabah diakui pada laba rugi.

g. Instrumen Keuangan

Pembelian atau penjualan yang reguler atas instrumen keuangan diakui pada tanggal transaksi.

Instrumen keuangan pada pengakuan awal diukur pada nilai wajarnya, yang merupakan nilai wajar kas yang diserahkan (dalam hal aset keuangan) atau yang diterima (dalam liabilitas keuangan). Nilai ditentukan dengan mengacu pada harga transaksi atau harga pasar yang berlaku. Jika harga pasar tidak dapat ditentukan dengan andal, maka nilai wajar dihitung berdasarkan estimasi jumlah seluruh pembayaran atau penerimaan kas masa depan, yang didiskontokan menggunakan suku bunga pasar yang berlaku untuk instrumen sejenis dengan jatuh tempo yang sama atau hampir sama. Pengukuran awal instrumen keuangan termasuk biaya transaksi, kecuali untuk instrumen keuangan yang diukur pada nilai wajar melalui laba rugi.

Biaya transaksi diamortisasi sepanjang umur instrumen menggunakan metode suku bunga efektif.

Pengklasifikasian instrumen keuangan dilakukan berdasarkan tujuan perolehan instrumen tersebut dan mempertimbangkan apakah instrumen tersebut memiliki kuotasi harga di pasar aktif.

Pada tanggal 31 Desember 2018 dan 2017, Grup memiliki instrumen keuangan pada kategori pinjaman yang diberikan dan piutang dan liabilitas keuangan lain-lain. Dengan demikian, kebijakan akuntansi yang berkaitan dengan aset keuangan yang diukur pada nilai wajar melalui laba rugi, investasi dimiliki hingga jatuh tempo, aset keuangan tersedia untuk dijual dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi tidak diungkapkan.

f. Sukuk Mudharabah

Sukuk Mudharabah is recognized at nominal value in the consolidated statement of financial position. Transaction costs pertaining to the issuance of Sukuk are presented separately as deferred charges in the assets section and are being amortized over the term of the Sukuk Mudharabah. Amortization of transaction costs of the Sukuk Mudharabah is recognized in profit or loss.

g. Financial Instruments

All regular way purchases and sales of financial instruments are recognized on the transaction date.

Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The fair value is determined by reference to the transaction price or other market prices. If such market prices are not reliably determinable, the fair value is estimated as the sum of all future cash payments or receipts, discounted using the prevailing market rates of interest for similar instruments with similar maturities. The initial measurement of financial instruments, except for financial instruments at fair value through profit and loss (FVPL), includes transaction costs.

Transaction costs are amortized over the terms of the instruments based on the effective interest rate method.

The classification of the financial instruments depends on the purpose for which the instruments were acquired and whether they are quoted in an active market.

As of December 31, 2018 and 2017, the Group has financial instruments under loans and receivables and other financial liabilities categories. Thus, accounting policies related to financial assets and financial liabilities at FVPL, held-to-maturity (HTM) investments and available for sale (AFS) financial assets were not disclosed.

Laba/Rugi Hari ke-1

Apabila harga transaksi dalam suatu pasar yang tidak aktif berbeda dengan nilai wajar instrumen sejenis pada transaksi pasar terkini yang dapat diobservasi atau berbeda nilai dengan wajar yang dihitung menggunakan teknik penilaian dimana variabelnya merupakan data yang diperoleh dari pasar yang dapat diobservasi, maka Grup mengakui selisih antara harga transaksi dengan nilai wajar tersebut (yakni Laba/Rugi hari ke-1) dalam laba rugi, kecuali jika selisih tersebut memenuhi kriteria pengakuan sebagai aset yang lain. Dalam hal tidak terdapat data yang dapat diobservasi, maka selisih antara harga transaksi dan nilai yang ditentukan berdasarkan teknik penilaian hanya diakui dalam laba rugi apabila data tersebut menjadi dapat diobservasi atau pada saat instrumen tersebut dihentikan Untuk masing-masing pengakuannya. transaksi. Grup menerapkan metode pengakuan Laba/Rugi Hari ke-1 yang sesuai.

Aset Keuangan

Pinjaman yang Diberikan dan Piutang

Pinjaman yang diberikan dan piutang adalah aset keuangan non-derivatif dengan pembayaran tetap atau telah ditentukan dan tidak mempunyai kuotasi di pasar aktif, yang selanjutnya diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif, dikurangi cadangan kerugian penurunan nilai.

Pada tanggal 31 Desember 2018 dan 2017, kategori ini meliputi kas dan setara kas, piutang usaha, piutang lain-lain dan uang jaminan yang dimiliki oleh Grup.

Liabilitas Keuangan

Liabilitas Keuangan Lain-lain

Kategori ini merupakan liabilitas keuangan yang tidak dimiliki untuk diperdagangkan atau pada saat pengakuan awal tidak ditetapkan untuk diukur pada nilai wajar melalui laba rugi.

Day 1 Profit/Loss

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a "Day 1" profit/loss) in the profit or loss unless it qualifies for recognition as some other type of asset. In cases where the data is not observable, the difference between the transaction price and model value is only recognized in the profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the "Day 1" profit/loss amount.

Financial Assets

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortized cost using the effective interest rate method, less any allowance for any impairment.

As of December 31, 2018 and 2017, the Group's cash and cash equivalents, trade accounts receivable, other accounts receivable and guarantee deposits are included in this category.

Financial Liabilities

Other Financial Liabilities

This category pertains to financial liabilities that are not held for trading or not designated at FVPL upon the inception of the liability.

Instrumen keuangan yang diterbitkan atau komponen dari instrumen keuangan tersebut, yang tidak diklasifikasikan sebagai liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi, diklasifikasikan liabilitas sebagai keuangan lain-lain, substansi perjanjian kontraktual jika mengharuskan Grup untuk menyerahkan kas atau aset keuangan lain kepada pemegang instrumen keuangan, atau jika liabilitas tersebut diselesaikan tidak melalui penukaran kas atau aset keuangan lain atau saham sendiri yang jumlahnya tetap atau telah ditetapkan.

Liabilitas keuangan lain-lain selanjutnya diukur pada biaya perolehan diamortisasi berdasarkan suku bunga efektif.

Pada tanggal 31 Desember 2018 dan 2017, kategori ini meliputi utang bank jangka pendek, utang usaha, utang lain-lain, beban akrual, pinjaman bank jangka panjang dan utang obligasi yang dimiliki oleh Grup.

Saling Hapus Instrumen Keuangan

Aset keuangan dan liabilitas keuangan saling hapus dan nilai bersihnya disajikan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, Grup saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut; dan berniat untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

Penurunan Nilai Aset Keuangan pada Biaya Perolehan Diamortisasi

Pada setiap tanggal laporan posisi keuangan, manajemen Grup menelaah apakah suatu aset keuangan atau kelompok aset keuangan telah mengalami penurunan nilai.

Issued financial instruments or their components, which are not classified as financial liabilities at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

Other financial liabilities are subsequently carried at amortized cost using the effective interest rate method.

As of December 31, 2018 and 2017, the Group's short-term bank loans, trade accounts payable, other accounts payable, accrued expenses, long-term bank loans and bonds payable are included in this category.

Offsetting of Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Impairment of Assets Carried at Amortized Cost

The Group's management assesses at each consolidated statement of financial position date whether a financial asset or group of financial assets is impaired.

Manajemen pertama-tama menentukan apakah terdapat bukti obyektif mengenai penurunan nilai secara individual atas aset keuangan yang signifikan secara individual, dan secara individual atau kolektif untuk aset keuangan yang jumlahnya tidak signifikan secara individual. Jika manajemen menentukan tidak terdapat bukti obyektif mengenai penurunan nilai atas aset keuangan yang dinilai secara individual, baik aset keuangan tersebut signifikan atau tidak signifikan, maka aset tersebut dimasukkan ke dalam kelompok aset keuangan yang memiliki karakteristik risiko kredit yang seienis dan menilai penurunan kelompok tersebut secara kolektif. Aset yang penurunan nilainya dinilai secara individual, dan untuk itu kerugian penurunan nilai diakui atau tetap diakui, tidak termasuk dalam penilaian penurunan nilai secara kolektif.

Jika terdapat bukti obyektif bahwa rugi penurunan nilai telah terjadi, maka jumlah kerugian tersebut diukur sebagai selisih antara nilai tercatat aset dengan nilai kini estimasi arus kas masa depan yang didiskonto menggunakan suku bunga efektif awal dari aset tersebut. Nilai tercatat aset tersebut langsung dikurangi dengan terjadi penurunan nilai yang atau menggunakan akun cadangan dan jumlah kerugian yang terjadi diakui dalam laba rugi.

Jika, pada tahun berikutnya, jumlah kerugian penurunan nilai berkurang karena suatu peristiwa yang terjadi setelah penurunan nilai tersebut diakui, maka dilakukan penyesuaian atas cadangan kerugian penurunan nilai yang sebelumnya diakui. Pemulihan penurunan nilai selanjutnya diakui dalam laba rugi, dengan ketentuan nilai tercatat aset setelah pemulihan penurunan nilai tidak melampaui biaya perolehan diamortisasi pada tanggal pemulihan tersebut.

Penghentian Pengakuan Aset dan Liabilitas Keuangan

(1) Aset Keuangan

Aset keuangan (atau bagian dari aset keuangan atau kelompok aset keuangan serupa) dihentikan pengakuannya jika:

 Hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir;

The management first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the management determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss, is or continues to be recognized are not included in a collective assessment of impairment.

If there is an objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of loss is charged to profit or loss.

If, in a subsequent year, the amount of the impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in profit or loss, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Derecognition of Financial Assets and Liabilities

(1) Financial Assets

Financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

a. the rights to receive cash flows from the asset have expired;

PT MAYORA INDAH Tbk AND ITS SUBSIDIARIES
Notes to Consolidated Financial Statements

- b. Grup tetap memiliki hak untuk menerima arus kas dari aset keuangan tersebut, namun juga menanggung liabilitas kontraktual untuk membayar kepada pihak ketiga atas arus kas yang diterima tersebut secara penuh tanpa adanya penundaan yang signifikan berdasarkan suatu kesepakatan; atau
- c. Grup telah mentransfer haknya untuk menerima arus kas dari aset keuangan dan (i) telah mentransfer secara substansial seluruh risiko dan manfaat atas aset keuangan, atau (ii) secara substansial tidak mentransfer atau tidak memiliki seluruh risiko dan manfaat atas aset keuangan, namun telah mentransfer pengendalian atas aset keuangan tersebut.

(2) Liabilitas Keuangan

Liabilitas keuangan dihentikan pengakuannya jika liabilitas keuangan tersebut berakhir, dibatalkan, atau telah kadaluarsa.

h. Pengukuran Nilai Wajar

Pengukuran nilai wajar didasarkan pada asumsi bahwa transaksi untuk menjual aset atau mengalihkan liabilitas akan terjadi:

- di pasar utama untuk aset atau liabilitas tersebut atau;
- jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Grup harus memiliki akses ke pasar utama atau pasar yang paling menguntungkan pada tanggal pengukuran.

Nilai wajar aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset atau liabilitas tersebut, dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

- the Group retains the right to receive cash flows from the asset, but has assumed a contractual obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- c. the Group has transferred its rights to receive cash flows from the asset and either (i) has transferred substantially all the risks and rewards of the asset, or (ii) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(2) Financial Liabilities

A financial liability is derecognized when the obligation under the contract is discharged, cancelled or has expired.

h. Fair Value Measurement

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability or;
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The Group must have access to the principal or the most advantageous market at the measurement date.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomik dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya, atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Ketika Grup menggunakan teknik penilaian, maka Grup memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Seluruh aset dan liabilitas yang mana nilai wajarnya diukur atau diungkapkan dalam laporan keuangan konsolidasian, dikategorikan dalam hirarki nilai wajar sebagai berikut:

- Level 1 Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik;
- Level 2 Teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar dapat diobservasi, baik secara langsung maupun tidak langsung;
- Level 3 Teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar tidak dapat diobservasi.

Untuk aset dan liabilitas yang diukur pada nilai wajar secara berulang dalam laporan keuangan konsolidasian, maka Grup menentukan apakah telah terjadi transfer di antara level hirarki dengan menilai kembali pengkategorian level nilai wajar pada setiap akhir tahun pelaporan.

i. Persediaan

Persediaan dinyatakan berdasarkan biaya atau nilai realisasi bersih, mana yang lebih rendah (*the lower of cost and net realizable value*). Biaya persediaan ditentukan berdasarkan metode rata-rata tertimbang.

j. Biaya Dibayar Dimuka

Biaya dibayar dimuka diamortisasi selama masa manfaatnya atau periode kontrak dengan menggunakan metode garis lurus. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

When the Group uses valuation techniques, it maximizes the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy as follows:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities:
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether there are transfers between levels in the hierarchy by re-assessing categorization at the end of each reporting year.

i. Inventories

Inventories are stated at cost or net realizable value, whichever is lower. Cost is determined using the weighted average method

j. Prepaid Expenses

Prepaid expenses are amortized over their beneficial or contract periods using the straight-line method.

k. Aset Tetap

Pemilikan Langsung

Aset tetap, kecuali tanah, dinyatakan berdasarkan biaya perolehan, tetapi tidak termasuk biaya perawatan sehari-hari, dikurangi akumulasi penyusutan dan amortisasi dan akumulasi rugi penurunan nilai, jika ada. Tanah tidak disusutkan dan dinyatakan berdasarkan biaya perolehan dikurangi akumulasi rugi penurunan nilai, jika ada.

Biaya perolehan awal aset tetap meliputi harga perolehan, termasuk bea impor dan pajak pembelian yang tidak boleh dikreditkan dan biaya-biaya yang dapat diatribusikan secara langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan sesuai dengan tujuan penggunaan yang ditetapkan.

Beban-beban yang timbul setelah aset tetap digunakan, seperti beban perbaikan dan pemeliharaan, dibebankan ke laba rugi pada saat terjadinya. Apabila beban-beban tersebut menimbulkan peningkatan manfaat ekonomis di masa datang dari penggunaan aset tetap tersebut yang dapat melebihi kinerja normalnya, maka beban-beban tersebut dikapitalisasi sebagai tambahan biaya perolehan aset tetap.

Penyusutan dan amortisasi dihitung berdasarkan metode garis lurus (*straight-line method*) selama masa manfaat aset tetap sebagai berikut:

sebagai berikut:

Bangunan dan prasarana Mesin dan peralatan Peralatan kantor Kendaraan

Nilai tercatat aset tetap ditelaah kembali dan dilakukan penurunan nilai apabila terdapat peristiwa atau perubahan kondisi tertentu yang mengindikasikan nilai tercatat tersebut tidak dapat dipulihkan sepenuhnya.

Dalam setiap inspeksi yang signifikan, biaya inspeksi diakui dalam jumlah tercatat aset tetap sebagai suatu penggantian apabila memenuhi kriteria pengakuan. Biaya inspeksi signifikan yang dikapitalisasi tersebut diamortisasi selama periode sampai dengan saat inspeksi signifikan berikutnya.

k. Property, Plant and Equipment

Direct Acquisition

Property, plant and equipment, except land, are carried at cost, excluding day-to-day servicing, less accumulated depreciation and amortization and any impairment in value. Land is not depreciated and is carried at cost less any impairment in value.

The initial cost of property, plant and equipment consists of its purchase price, including import duties and taxes and any directly attributable costs in bringing the property, plant and equipment to its working condition and location for its intended use.

Expenditures incurred after the property, plant and equipment have been put into operations, such as repairs maintenance costs, are normally charged to operations in the year such costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of the property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment.

Depreciation and amortization are computed on a straight-line basis over the property, plant and equipment's useful lives as follows:

Tahun/Years

20	Buildings and improvements
5 - 10	Machineries and equipment
5	Office equipment
5	Vehicles

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable.

When each major inspection is performed, its cost is recognized in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Such major inspection is capitalized and amortized over the next major inspection activity.

Jumlah tercatat aset tetap dihentikan pengakuannya pada saat dilepaskan atau tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset tetap diakui dalam laba rugi pada tahun terjadinya penghentian pengakuan.

Nilai residu, umur manfaat, serta metode penyusutan dan amortisasi ditelaah setiap akhir tahun dan dilakukan penyesuaian apabila hasil telaah berbeda dengan estimasi sebelumnya.

Aset Dalam Penyelesaian

Aset dalam penyelesaian merupakan aset tetap dalam tahap konstruksi, yang dinyatakan pada biaya perolehan dan tidak disusutkan. Akumulasi biaya akan direklasifikasi ke akun aset tetap yang bersangkutan dan akan disusutkan pada saat konstruksi selesai secara substansial dan aset tersebut telah siap digunakan sesuai tujuannya.

I. Transaksi Sewa

Penentuan apakah suatu kontrak merupakan atau mengandung unsur sewa adalah berdasarkan substansi kontrak pada tanggal awal sewa, yakni apakah pemenuhan syarat kontrak tergantung pada penggunaan aset tertentu dan kontrak tersebut berisi hak untuk menggunakan aset tersebut.

1. Perlakuan Akuntansi untuk Lessee

Sewa pembiayaan, yang mengalihkan secara substansial seluruh risiko dan yang manfaat terkait dengan kepemilikan suatu aset kepada Grup, dikapitalisasi pada awal sewa sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu suku bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan ke laba rugi.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gains or loss arising from derecognition of property, plant and equipment is included in profit or loss in the year the item is derecognized.

The asset's residual values, if any, useful lives and depreciation and amortization method are reviewed and adjusted if appropriate, at each financial year-end.

Construction in Progress

Construction in progress represents property, plant and equipment under construction which is stated at cost and is not depreciated. The accumulated costs will be reclassified to the respective property, plant and equipment account and will be depreciated when the construction is substantially complete and the asset is ready for its intended use.

I. Lease Transactions

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement at inception date of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset

Accounting Treatment as a Lessee

Leases which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest in the remaining balance of the liability. Finance charges are recognized in profit or loss.

Aset sewaan disusutkan sepanjang estimasi umur manfaatnya. Apabila tidak terdapat keyakinan memadai bahwa Grup akan memperoleh hak kepemilikan atas aset tersebut pada akhir masa sewa, maka aset sewaan disusutkan sepanjang estimasi umur manfaat aset atau masa sewa, mana yang lebih pendek. Pembayaran sewa dalam sewa operasi diakui sebagai beban dalam laba rugi dengan dasar garis lurus (straight-line basis) selama masa sewa.

2. Perlakuan Akuntansi sebagai lessor

dimana Sewa Grup tetap mempertahankan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan suatu diklasifikasikan sebagai sewa operasi. Biaya langsung awal yang dapat diatribusikan secara langsung dengan negosiasi dan pengaturan sewa operasi ditambahkan ke nilai tercatat aset sewaan dan diakui ke laba rugi selama masa sewa sesuai dengan dasar pengakuan pendapatan sewa.

m. Distribusi Dividen

Distribusi dividen kepada pemegang saham Grup diakui sebagai liabilitas dalam laporan keuangan konsolidasian dalam tahun saat dividen tersebut disetujui oleh pemegang saham Grup.

n. Penurunan Nilai Aset Non-Keuangan

Pada setiap akhir periode pelaporan tahunan, Grup menelaah apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat uji penurunan nilai aset perlu dilakukan, maka Grup membuat estimasi jumlah terpulihkan aset tersebut.

Jika nilai tercatat aset lebih besar daripada nilai terpulihkannya, maka aset tersebut dinyatakan mengalami penurunan nilai dan rugi penurunan nilai diakui dalam laba rugi. Dalam menghitung nilai pakai, estimasi arus kas masa depan bersih didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset.

Capitalized leased assets are depreciated over the estimated useful life of the assets except if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, in which case the lease assets are depreciated over the shorter of the estimated useful life of the assets and the lease term. Operating lease payments are recognized as an expense in profit or loss on a straight-line basis over the lease term.

2. Accounting Treatment as a Lessor

Leases where the Group retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized in profit or loss over the lease term on the same basis as rental income.

m. Dividend Distribution

Dividend distribution to the Group's shareholders is recognized as a liability in the consolidated financial statements in the year in which the dividends are approved by the Group's shareholders.

n. Impairment of Non-Financial Assets

The Group assesses at each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, or when impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and impairment losses are recognized in profit or loss. In assessing the value in use, the estimated net future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Penelaahan dilakukan pada akhir setiap pelaporan tahunan untuk mengetahui apakah terdapat indikasi bahwa rugi penurunan nilai aset yang telah diakui dalam periode sebelumnya mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka mengestimasi jumlah terpulihkan aset tersebut. Kerugian penurunan nilai yang diakui dalam periode sebelumnya akan dipulihkan apabila nilai tercatat aset tidak melebihi jumlah terpulihkannya maupun nilai tercatat, neto setelah penyusutan dan amortisasi, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada tahun-tahun sebelumnya. Setelah pemulihan tersebut, penyusutan aset tersebut disesuaikan di tahun mendatang untuk mengalokasikan nilai tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

o. Pengakuan Pendapatan dan Beban

Pendapatan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh Grup dan jumlahnya dapat diukur secara andal.

Pendapatan atas penjualan dalam negeri diakui pada saat barang diserahkan kepada pelanggan. Pendapatan atas penjualan ekspor diakui sesuai dengan syarat penjualan (f.o.b. shipping point).

Pendapatan diukur dengan nilai wajar imbalan yang diterima atau dapat diterima dari penjualan barang dan jasa dalam kegiatan usaha normal Grup. Pendapatan disajikan bersih setelah dikurangkan dengan Pajak Pertambahan Nilai, pengembalian, rabat dan diskon dan setelah eliminasi penjualan intra Grup.

Pendapatan bunga dan beban bunga dari instrumen keuangan diakui dalam laba rugi secara akrual menggunakan metode suku bunga efektif.

Beban diakui pada saat terjadinya (accrual basis).

An assessment is made at each reporting year as to whether there is any indication that previously recognized impairment losses recognized for an asset may no longer exist or may have decreased. If such indication exists, the recoverable amount is previously estimated Α recognized impairment loss for an asset is reversed in profit or loss to the extent that the carrying amount of the assets does not exceed its recoverable amount nor exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior periods. After such a reversal, the depreciation and amortization charge on the said asset is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

o. Revenue and Expense Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured.

Revenue from local sales is recognized when the goods are delivered to the customers. Revenue from export sales is recognized when the goods are shipped (f.o.b. shipping point).

Revenue is measured as the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the Group.

Interest income and interest expense for all financial instruments are recognized in profit or loss on accrual basis using the effective interest rate method.

Expenses are recognized when incurred (accrual basis).

p. Biaya Pinjaman

Biaya pinjaman yang dapat diatribusikan secara langsung dengan perolehan, konstruksi, atau pembuatan aset kualifikasian dikapitalisasi sebagai bagian dari biaya perolehan aset tersebut. Biaya pinjaman lainnya diakui sebagai beban pada saat terjadinya.

Jika Grup meminjam dana secara khusus untuk tujuan memperoleh aset kualifikasian, maka Grup menentukan jumlah biaya pinjaman yang layak dikapitalisasikan sebesar biaya pinjaman aktual yang terjadi selama tahun berjalan dikurangi penghasilan investasi atas investasi sementara dari pinjaman tersebut.

Jika pengembangan aktif atas aset kualifikasian dihentikan, Grup menghentikan kapitalisasi biaya pinjaman selama periode yang diperpanjang tersebut.

Kapitalisasi biaya pinjaman dihentikan saat selesainya secara subtansi seluruh aktivitas yang diperlukan untuk mempersiapkan aset kualifikasian agar dapat digunakan atau dijual sesuai dengan maksudnya.

q. Imbalan Kerja

Liabilitas imbalan kerja jangka pendek

Imbalan kerja jangka pendek merupakan upah, gaji, dan tunjangan lainnya. Imbalan kerja jangka pendek diakui sebesar jumlah yang tak-terdiskonto sebagai liabilitas pada laporan posisi keuangan konsolidasian setelah dikurangi dengan jumlah yang telah dibayar dan sebagai beban pada laba rugi tahun berjalan.

Liabilitas imbalan kerja jangka panjang

Liabilitas imbalan kerja jangka panjang merupakan imbalan pasca-kerja manfaat pasti yang dibentuk tanpa pendanaan khusus dan didasarkan pada masa kerja dan jumlah penghasilan karyawan pada saat pensiun yang dihitung menggunakan metode *Projected Unit Credit.* Pengukuran kembali liabilitas imbalan pasti langsung diakui dalam laporan posisi keuangan konsolidasian dan penghasilan komprehensif lain pada tahun terjadinya dan tidak akan direklasifikasi ke laba rugi, namun menjadi bagian dari saldo laba. Biaya liabilitas imbalan pasti lainnya terkait dengan program imbalan pasti diakui dalam laba rugi.

p. Borrowing Costs

Borrowing costs which are directly attributable to the acquisition, construction, or production of qualifying assets are capitalized as part of the acquisition cost of the qualifying assets. Other borrowing costs are recognized as expense in the year in which they are incurred.

To the extent that the Group borrows funds specifically for the purpose of obtaining a qualifying asset, the Group determines the amount of borrowing costs eligible for capitalization as the actual borrowing costs incurred on that borrowing during the year less any investment income on the temporary investment of those borrowings.

The Group suspends capitalization of borrowing costs during extended periods in which it suspends active development of a qualifying asset.

The Group ceases capitalizing borrowing costs when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

q. Employee Benefits

Short-term employee benefits liability

Short-term employee benefits inclu wages, salary and other employee benefits. Short-term employee benefits are recognized at its undiscounted amount as a liability after deducting any amount already paid in the consolidated statement of financial position and as an expense in profit or loss during the year.

Long-term employee benefits liability

benefits liability Long-term employee represents post-employment benefits, defined-benefit plans unfunded which amounts are determined based on years of service and salaries of the employees at the time of pension and calculated using the Projected Unit Credit. Remeasurement is reflected immediately in the consolidated statement of financial position with a charge or credit recognized in other comprehensive income in the year in which they occur and not to be reclassified to profit or loss but reflected immediately in retained earnings. All other costs related to the defined-benefits plan are recognized in profit or loss.

r. Pajak Penghasilan

Pajak Kini

Pajak kini ditentukan berdasarkan laba kena pajak dalam tahun yang bersangkutan yang dihitung berdasarkan tarif pajak yang berlaku.

Pajak Tangguhan

Pajak tangguhan diakui sebagai liabilitas jika terdapat perbedaan temporer kena pajak yang timbul dari perbedaan antara dasar pengenaan pajak aset dan liabilitas dengan jumlah tercatatnya pada tanggal pelaporan.

Aset pajak tangguhan diakui untuk seluruh perbedaan temporer yang dapat dikurangkan dan rugi fiskal yang dapat dikompensasikan. Aset pajak tangguhan diakui dan direviu pada setiap tanggal pelaporan atau diturunkan jumlah tercatatnya, sepanjang kemungkinan besar laba kena pajak tersedia untuk pemanfaatan perbedaan temporer yang dapat dikurangkan dan rugi fiskal yang dapat dikompensasikan.

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku ketika aset dipulihkan atau liabilitas diselesaikan, berdasarkan tarif pajak (atau peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada tanggal pelaporan.

Aset pajak tangguhan dan liabilitas pajak tangguhan saling hapus jika dan hanya jika, terdapat hak yang dipaksakan secara hukum untuk melakukan saling hapus aset pajak kini terhadap liabilitas pajak kini dan pajak tangguhan tersebut terkait dengan entitas kena pajak yang sama dan dikenakan oleh otoritas perpajakan yang sama.

s. Laba per Saham

Laba per saham dihitung dengan membagi laba yang dapat diatribusikan kepada pemilik entitas induk dengan jumlah rata-rata tertimbang saham yang beredar pada tahun yang bersangkutan.

r. Income Tax

Current Tax

Current tax expense is determined based on the taxable income for the year computed using prevailing tax rates.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognized for all deductible temporary differences and the carry forward benefit of any unused tax losses. Deferred tax assets are recognized and reviewed at each reporting date and reduced to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward benefit of unused tax losses can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (or tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if and only if, a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

s. Earnings per Share

Earnings per share are computed by dividing profit attribute to owners of the Company by the weighted average number of shares outstanding during the year.

t. Segmen Operasi

Informasi segmen operasi disusun sesuai dengan kebijakan akuntansi yang dianut dalam penyusunan dan penyajian laporan keuangan konsolidasian.

Segmen operasi diidentifikasi berdasarkan laporan internal komponen-komponen Grup yang secara berkala dilaporkan kepada pengambil keputusan operasional dalam rangka alokasi sumber daya ke dalam segmen dan penilaian kinerja Grup.

u. Provisi

Provisi diakui jika Grup mempunyai kewajiban kini (hukum maupun konstruktif) sebagai akibat peristiwa masa lalu, yang memungkinkan Grup harus menyelesaikan kewajiban tersebut dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

v. Peristiwa Setelah Tanggal Pelaporan

Peristiwa-peristiwa yang terjadi setelah periode pelaporan yang menyediakan tambahan informasi mengenai posisi keuangan konsolidasian Grup pada tanggal laporan posisi keuangan konsolidasian (peristiwa penyesuai), jika ada, telah tercermin dalam laporan keuangan Peristiwa-peristiwa konsolidasian. yang terjadi setelah tahun pelaporan yang tidak memerlukan penyesuaian (peristiwa nonpenyesuai), apabila jumlahnya material, telah diungkapkan dalam laporan keuangan konsolidasian.

Penggunaan Pertimbangan, Estimasi dan Asumsi Manajemen

Dalam penerapan kebijakan akuntansi Grup, seperti yang diungkapkan dalam Catatan 2 pada laporan keuangan konsolidasian, manajemen harus membuat pertimbangan, estimasi dan asumsi atas nilai tercatat aset dan liabilitas yang tidak tersedia oleh sumber-sumber lain. Estimasi dan asumsi tersebut, berdasarkan pengalaman historis dan faktor lain yang dipertimbangkan relevan.

Manajemen berkeyakinan bahwa pengungkapan berikut telah mencakup ikhtisar pertimbangan, estimasi dan asumsi signifikan yang dibuat oleh manajemen, yang berdampak terhadap jumlahjumlah yang dilaporkan serta pengungkapan dalam laporan keuangan konsolidasian.

t. Operating Segment

Operating segment information is prepared using the accounting policies adopted for preparing and presenting the consolidated financial statements.

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segments and to assess their performances.

u. Provisions

Provisions are recognized when the Group has present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

v. Events After the Reporting Date

Post year-end events that provide additional information about the consolidated statement of financial position at the reporting date (adjusting events), if any, are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

3. Management Use of Judgments, Estimates and Assumptions

In the application of the Group's accounting policies, which are described in Note 2 to the consolidated financial statements, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and assumptions are based on historical experience and other factors that are considered to be relevant.

Management believes that the following disclosures include a summary of the significant judgments, estimates and assumptions made, which affected the total reported amounts and disclosures in the consolidated financial statements.

Pertimbangan

Pertimbangan-pertimbangan berikut dibuat oleh manajemen dalam proses implementasi kebijakan akuntansi Grup yang memiliki dampak yang paling signifikan terhadap jumlah-jumlah yang diakui dalam laporan keuangan:

a. Mata Uang Fungsional

Dalam proses penerapan kebijakan akuntansi Grup, manajemen telah membuat pertimbangan untuk menentukan mata uang fungsional Perusahaan dan entitas anak.

Mata uang fungsional Perusahaan dan entitas anak adalah mata uang lingkungan ekonomi utama dimana masing-masing entitas beroperasi. Mata uang tersebut adalah yang paling mempengaruhi harga jual barang dan jasa, dan mata uang dari negara yang kekuatan persaingan dan peraturannya sebagian besar menentukan harga jual barang dan jasa entitas, dan merupakan mata uang yang mana dana dari aktivitas pendanaan dihasilkan.

b. Klasifikasi Aset Keuangan dan Liabilitas Keuangan

Grup menentukan klasifikasi aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan menilai apakah aset dan liabilitas tersebut memenuhi definisi yang ditetapkan dalam PSAK No. 55. Aset keuangan dan liabilitas keuangan dicatat sesuai dengan kebijakan akuntansi Grup sebagaimana diungkapkan dalam Catatan 2.

c. Cadangan Kerugian Penurunan Nilai Pinjaman yang Diberikan dan Piutang

Cadangan kerugian penurunan nilai pinjaman yang diberikan dan piutang dipelihara pada jumlah yang menurut manajemen adalah memadai untuk menutup kemungkinan tidak tertagihnya aset keuangan. Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup secara spesifik menelaah apakah telah terdapat bukti obyektif bahwa suatu aset keuangan telah mengalami penurunan nilai (tidak tertagih).

Judgments

The following judgments are made by management in the process of applying the Group's accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

a. Functional Currency

In the process of applying the Group's accounting policies, management has made judgment on the determination of functional currency of the Company and its subsidiaries.

The functional currency of the Company and its subsidiaries is the currency of the primary economic environment in which each of them operates. It is the currency, among others, that mainly influences sales prices for goods and services, and of the country whose competitive forces and regulations mainly determine the sales prices of its goods and services, and the currency in which funds from financing activities are generated.

b. Classification of Financial Assets and Financial Liabilities

The Group determines the classifications of certain assets and liabilities as financial assets and liabilities by judging if they meet the definition set forth in PSAK No. 55. Accordingly, the financial assets and liabilities are accounted for in accordance with the Group's accounting policies disclosed in Note 2.

c. Allowance for Impairment of Loans and Receivables

Allowance for impairment losses is maintained at a level considered adequate to provide for potentially uncollectible receivables. The Group assesses specifically at each consolidated statement of financial position date whether there is objective evidence that a financial asset is impaired (uncollectible).

Cadangan yang dibentuk adalah berdasarkan pengalaman penagihan masa lalu dan faktor-faktor lainnya yang mungkin mempengaruhi kolektibilitas, antara lain kemungkinan kesulitan likuiditas atau kesulitan keuangan yang signifikan yang dialami oleh debitur atau penundaan pembayaran yang signifikan.

The level of allowance is based on past collection experience and other factors that may affect collectability such as the probability of insolvency or significant financial difficulties of the debtors or significant delay in payments.

Jika terdapat bukti obyektif penurunan nilai, maka saat dan besaran jumlah yang dapat ditagih diestimasi berdasarkan pengalaman kerugian masa lalu. Cadangan kerugian penurunan nilai dibentuk atas akun-akun yang diidentifikasi secara spesifik telah mengalami penurunan nilai. Akun pinjaman yang diberikan dan piutang dihapusbukukan berdasarkan keputusan manajemen bahwa aset keuangan tersebut tidak dapat ditagih atau direalisasi meskipun segala cara dan tindakan telah dilaksanakan. Suatu evaluasi atas pinjaman dan piutang, yang bertujuan untuk mengidentifikasi jumlah cadangan yang harus dibentuk, dilakukan secara berkala sepanjang tahun. Oleh karena itu, saat dan besaran jumlah cadangan kerugian penurunan nilai yang tercatat pada setiap tahun dapat berbeda tergantung pada pertimbangan dan estimasi yang digunakan.

If there is an objective evidence of impairment, timing and collectible amounts are estimated based on historical loss data. Allowance is provided on accounts specifically identified as impaired. Written off loans and receivables are based on management's decisions that the financial assets are uncollectible or cannot be realized in whatsoever actions have been taken. Evaluation of loan and receivables to determine the total allowance to be provided is performed periodically during the year. Therefore, the timing and amount of allowance recorded at each period might differ based on the judgments and estimates that have been used.

Komitmen sewa operasi – Grup sebagai lessor

Grup telah menandatangani sejumlah perjanjian sewa ruangan. Grup menentukan bahwa sewa tersebut adalah sewa operasi karena Grup menanggung secara signifikan seluruh risiko dan manfaat dari kepemilikan aset-aset tersebut.

e. Pajak Penghasilan

Pertimbangan yang signifikan dibutuhkan untuk menentukan jumlah pajak penghasilan. Terdapat sejumlah transaksi dan perhitungan yang menimbulkan ketidakpastian penentuan jumlah pajak penghasilan karena interpretasi atas peraturan pajak yang berbeda. Jika hasil pemeriksaan pajak berbeda dengan jumlah yang sebelumnya telah dibukukan, maka selisih tersebut akan berdampak terhadap aset dan liabilitas pajak kini dan tangguhan dalam periode dimana hasil pemeriksaan tersebut terjadi.

Estimasi dan Asumsi

Asumsi utama mengenai masa depan dan sumber utama lain dalam mengestimasi ketidakpastian pada tanggal pelaporan yang mempunyai risiko signifikan yang dapat menyebabkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam tahun berikutnya diungkapkan di bawah ini. Grup mendasarkan asumsi dan estimasi pada parameter yang tersedia saat laporan keuangan konsolidasian disusun. Kondisi yang ada dan asumsi mengenai perkembangan masa depan dapat berubah karena perubahan situasi pasar yang berada di luar kendali Grup. Perubahan tersebut tercermin dalam asumsi ketika keadaan tersebut terjadi:

Nilai Wajar Aset Keuangan dan Liabilitas Keuangan

Standar Akuntansi Keuangan di Indonesia mensyaratkan pengukuran aset keuangan liabilitas keuangan tertentu pada penyajian nilai wajarnya, dan ini mengharuskan penggunaan estimasi. Komponen pengukuran nilai wajar yang signifikan ditentukan berdasarkan bukti-bukti obyektif yang dapat diverifikasi (seperti nilai tukar, suku bunga), sedangkan saat dan besaran perubahan nilai wajar dapat menjadi berbeda karena penggunaan metode penilaian yang berbeda.

Operating lease commitments – Group as lessor

The Group has entered into various commercial lease agreements. The Group has determined that those are operating leases since the Group bears substantially all the significant risks and rewards of ownership of the related assets.

e. Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain due to different interpretation of tax regulations. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will have an impact on the current and deferred income tax assets and liabilities in the period in which such determination is made.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes on circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur:

a. Fair Value of Financial Assets and Financial Liabilities

Indonesian Financial Accounting Standards require measurement of certain financial assets and liabilities at fair values, and the disclosure requires the use of estimates. Significant component of fair value measurement is determined based on verifiable objective evidence (i.e. foreign exchange rate, interest rate), while timing and amount of changes in fair value might differ due to different valuation method used.

Nilai wajar aset keuangan dan liabilitas keuangan diungkapkan pada Catatan 18.

b. Estimasi Masa Manfaat Aset Tetap

Masa manfaat masing-masing aset tetap Grup diestimasi sepanjang masa aset tersebut diharapkan tersedia untuk digunakan. Estimasi tersebut berdasarkan penelaahan kolektif atas usaha yang sama, evaluasi teknis internal dan pengalaman dengan aset sejenis. Estimasi masa manfaat masing-masing aset ditinjau secara berkala dan diperbarui jika diperkirakan berbeda dari estimasi sebelumnya karena batas pakai, usang baik secara teknis atau komersial, dan pembatasan hukum atau lainnya atas penggunaan aset. Hasil operasi di masa depan dapat secara material terpengaruhi oleh perubahan dalam jumlah dan waktu pencatatan beban yang disebabkan oleh perubahan faktor-faktor tersebut. Penurunan estimasi masa manfaat aset tetap akan meningkatkan beban penyusutan dan menurunkan nilai tercatat aset tetap.

Nilai tercatat aset tetap pada tanggal 31 Desember 2018 dan 2017 diungkapkan pada Catatan 9.

c. Penurunan Nilai Aset Non-Keuangan

Penelaahan atas penurunan nilai dilakukan apabila terdapat indikasi penurunan nilai aset tertentu. Penentuan nilai wajar membutuhkan estimasi arus kas yang diharapkan akan dihasilkan dari pemakaian berkelanjutan dan pelepasan akhir atas aset tersebut. Perubahan signifikan dalam asumsi-asumsi yang digunakan untuk menentukan nilai wajar dapat berdampak signifikan pada nilai terpulihkan dan jumlah kerugian penurunan nilai yang terjadi mungkin berdampak material pada hasil operasi Grup.

Nilai tercatat aset non-keuangan pada tanggal 31 Desember 2018 dan 2017 diungkapkan pada Catatan 9. The fair values of financial assets and financial liabilities are set out in Note 18.

b. Estimated Useful Lives of Property, Plant and Equipment

The useful life of each of the item of the Group's property, plant and equipment is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar business, internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence, and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of property, plant and equipment would increase the recorded depreciation and amortization and decrease the carrying value of the asset.

The carrying values of property, plant and equipment as of December 31, 2018 and 2017 are set out in Note 9.

c. Impairment of Non-financial Assets

Impairment review is performed when certain impairment indicators are present. Determining the fair value of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. Any significant changes in the assumptions used in determining the fair value may materially affect the assessment of recoverable values and any resulting impairment loss could have a material impact on results of operations.

The carrying values of non-financial assets as of December 31, 2018 and 2017 are set out in Note 9.

d. Liabilitas Imbalan Kerja Jangka Panjang

Penentuan liabilitas imbalan kerja jangka panjang dipengaruhi oleh asumsi tertentu digunakan oleh aktuaris dalam menghitung jumlah tersebut. Asumsi-asumsi tersebut dijelaskan dalam Catatan 28 dan mencakup, antara lain, tingkat kenaikan gaji, dan tingkat diskonto yang ditentukan dengan mengacu pada imbal hasil pasar atas bunga Obligasi Pemerintah dalam mata uang yang sama dengan mata uang pembayaran imbalan dan memiliki jangka waktu yang mendekati estimasi jangka waktu liabilitas imbalan kerja jangka panjang tersebut. Hasil aktual yang berbeda dengan asumsi Grup dibukukan pada penghasilan komprehensif lain dan dengan demikian, berdampak pada jumlah penghasilan komprehensif lain yang diakui dan liabilitas yang tercatat pada tahuntahun mendatang. Manajemen berkeyakinan bahwa asumsi-asumsi yang digunakan adalah tepat dan wajar, namun demikian, perbedaan signifikan pada hasil aktual, atau perubahan signifikan dalam asumsi-asumsi tersebut dapat berdampak signifikan pada jumlah liabilitas imbalan kerja jangka panjang.

Jumlah liabilitas imbalan kerja jangka panjang pada tanggal 31 Desember 2018 dan 2017 diungkapkan pada Catatan 28.

e. Aset Pajak Tangguhan

Aset pajak tangguhan diakui untuk semua perbedaan temporer antara nilai tercatat aset dan liabilitas pada laporan keuangan konsolidasian dengan dasar pengenaan pajak jika kemungkinan besar jumlah laba kena pajak akan memadai untuk pemanfaatan perbedaan temporer yang diakui. Estimasi manajemen yang signifikan diperlukan untuk menentukan jumlah aset pajak tangguhan yang diakui berdasarkan kemungkinan waktu terealisasinya dan jumlah laba kena pajak pada masa mendatang serta strategi perencanaan pajak masa depan.

Nilai tercatat aset pajak tangguhan pada tanggal 31 Desember 2018 dan 2017 diungkapkan pada Catatan 29.

d. Long-term Employee Benefits

The determination of the long-term employee benefits is dependent on the selection of certain assumptions used by actuary in calculating such amounts. Those assumptions are described in Note 28 and include, among others, rate of salary increase, and discount rate which is determined after giving consideration to interest rates of Government Bonds that are denominated in the currency in which the benefits are to be paid and have terms of maturity approximating the terms of the related employee benefits liability. Actual results that differ from the Group's assumptions are charged to comprehensive income and therefore, generally affect the recognized comprehensive income and recorded obligation in such future periods. While it is believed that the Group's assumptions are reasonable appropriate, significant differences in actual experience or significant changes in assumptions may materially affect the amount of long-term employee benefits liability.

Long-term employee benefits liability as of December 31, 2018 and 2017 is disclosed in Note 28.

e. Deferred Tax Assets

Deferred tax assets are recognized for all temporary differences between consolidated financial statements' carrying amounts of existing assets and liabilities and their respective taxes bases to the extent that it is probable that taxable profit will be available against which the temporary differences can be utilized. Significant management estimates are required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

As of December 31, 2018 and 2017, the carrying amounts of deferred tax assets are set out in Note 29.

Berdasarkan evaluasi manajemen terhadap kolektibilitas saldo masing-masing piutang pada tanggal 31 Desember 2018 dan 2017, cadangan kerugian penurunan nilai memadai untuk menutup kemungkinan kerugian dari tidak tertagihnya piutang usaha tersebut.

Manajemen juga berpendapat bahwa tidak terdapat risiko yang terkonsentrasi secara signifikan atas piutang kepada pihak ketiga.

Tidak terdapat piutang usaha yang dijaminkan.

Based on management's evaluation of the collectibility of the individual receivable account as of December 31, 2018 and 2017, allowance for impairment is adequate to cover possible losses from uncollectible accounts.

Management also believes that there are no significant concentrations of credit risk on trade accounts receivable from third parties.

No trade accounts receivable are used as collateral for bank loans.

Grup memiliki beberapa bidang tanah yang terletak di Bekasi, Tangerang, Deli Serdang (Sumatera Utara) dan Sidoarjo (Jawa Timur) dengan hak legal berupa Hak Milik dan Hak Guna Bangunan (HGB) yang berjangka waktu 20 tahun dan 30 tahun yang akan jatuh tempo antara tahun 2038 dan 2045. Manajemen berkeyakinan dapat memperpanjang hak milik tanah pada saat jatuh tempo karena seluruh tanah diperoleh secara legal dan didukung oleh bukti kepemilikan yang memadai.

Pengurangan pada tahun 2018 dan 2017 termasuk penghapusan aset tetap dengan nilai tercatat sebesar Rp 94.984.304 dan Rp 281.284.469.

Aset tetap, kecuali tanah, telah diasuransikan terhadap risiko kebakaran, pencurian dan risiko lainnya kepada PT Asuransi FPG Indonesia, pihak ketiga, dengan jumlah pertanggungan US\$ masing-masing sebesar 544.999.400 43.831.800.000 pada dan Rn tanggal 31 Desember 2018, dan US\$ 521,495,000 dan Rρ 48.147.000.000 pada 31 Desember 2017.

Manajemen berpendapat bahwa nilai pertanggungan tersebut cukup untuk menutupi kemungkinan kerugian atas aset yang dipertanggungkan.

Tidak terdapat aset tetap yang dijadikan jaminan untuk utang bank.

Manajemen berpendapat bahwa tidak terdapat penurunan nilai tercatat aset tetap pada tanggal 31 Desember 2018 dan 2017.

Pada tanggal 31 Desember 2018 dan 2017, biaya perolehan Grup atas aset tetap yang telah disusutkan sepenuhnya tetapi masih digunakan masing-masing sebesar Rp 1.660.084.033.575 dan Rp 1.621.891.021.060.

Nilai wajar tanah, bangunan dan prasarana bangunan disajikan pada Catatan 18.

10. Uang Muka Pembelian Aset Tetap

Akun ini terutama merupakan uang muka pembelian properti, mesin dan peralatan.

The Group owns several parcels of land located in Bekasi, Tangerang, Deli Serdang (North Sumatera) and Sidoarjo (East Java), with Building Use Rights (Hak Guna Bangunan or HGB) and Ownership Rights (Hak Milik) for periods of 20 and 30 years, respectively, until 2038 and 2043, respectively. Management believes that it is probable to extend the term of the land rights upon its expiration since all the land were acquired legally and supported by sufficient evidence of ownership.

Deductions in 2018 and 2017 include write-off of property and equipment with net book value of Rp 94,984,304 and Rp 281,284,469, respectively.

Property, plant and equipment, except for land, are insured against fire, theft and other possible risks with PT Asuransi FPG Indonesia, third party, for US\$ 544,999,400 and Rp 43,831,800,000, as of December 31, 2018 and US\$ 521,495,000 and Rp 48,147,000,000 as of December 31, 2017.

Management believes that the insurance coverage is adequate to cover possible losses on the assets insured.

No property, plant and equipment are used as collateral for bank loans.

Management believes that there is no impairment in values of the aforementioned property, plant and equipment as of December 31, 2018 and 2017.

As of December 31, 2018 and 2017, acquisition costs of the Group's property, plant and equipment that are fully-depreciated but are still in use amounted to Rp 1,660,084,033,575 and Rp 1,621,891,021,060, respectively.

The fair values of the land, buildings and improvements are set out in Note 18.

Nilai wajar instrumen keuangan yang diperdagangkan di pasar aktif adalah berdasarkan kuotasi harga pasar pada tanggal pelaporan. Pasar dianggap aktif apabila kuotasi harga tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek atau perantara efek, badan penyedia jasa penentuan harga kelompok industri atau badan pengatur, dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Instrumen keuangan ini termasuk dalam hirarki Level 1.

Nilai wajar instrumen keuangan yang tidak diperdagangkan di pasar aktif ditentukan menggunakan teknik penilaian. Teknik penilaian ini memaksimalkan penggunaan data pasar yang dapat diobservasi yang tersedia dan sesedikit mungkin mengandalkan estimasi spesifik yang dibuat oleh entitas. Jika seluruh input signifikan yang dibutuhkan untuk menentukan nilai wajar dapat diobservasi, maka instrumen tersebut termasuk dalam hirarki Level 2. Nilai wajar utang bank diestimasi berdasarkan arus kas yang didiskontokan dengan suku bunga pasar yang dapat diobservasi.

Analisa arus kas diskonto digunakan untuk menentukan nilai wajar instrumen keuangan Level 3.

Pengukuran nilai wajar berulang aset non keuangan termasuk dalam hirarki Level 3. Nilai wajar dari tanah, bangunan dan prasarana bangunan didasarkan pada nilai jual objek pajak yang digunakan untuk menghitung pajak tanah dan bangunan (PBB).

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer or broker, industry group pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transaction on an arm's length basis. The financial statements included in the hierarchy Level 1.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity's specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2. The fair value of bank loans is estimated based on discounted cash flows using observable market interest rate.

Discounted cash flow analysis are used to determine fair value of the financial instruments in Level 3.

The fair value measurement for recurring nonfinancial assets falls within Level 3 of the hierarchy. The fair value of land, buildings and improvements are based on the sale value of the tax object used to calculate its land and building tax (PBB).

Manajemen Permodalan

Tujuan utama dari manajemen permodalan Perusahaan adalah untuk mengelola rasio permodalan Grup tetap sehat dalam rangka mendukung usaha bisnis dan memaksimalkan nilai pemegang saham. Grup tidak diharuskan memenuhi persyaratan modal apapun.

Grup mengelola struktur modal dan membuat penyesuaian terhadap struktur modal sehubungan dengan perubahan kondisi ekonomi. Grup memantau modalnya dengan menggunakan analisa gearing ratio (rasio utang terhadap modal), yakni membagi utang bersih terhadap jumlah modal. Kebijakan Grup adalah untuk menjaga gearing ratio dalam kisaran yang setara dengan perusahaan lain dengan industri serupa di Indonesia. Utang bersih dihitung sebagai jumlah pinjaman (termasuk pinjaman "jangka pendek dan jangka panjang" seperti yang tercantum dalam laporan posisi keuangan konsolidasian) dikurangi dengan kas dan setara kas. Jumlah modal "jumlah ekuitas" sebagaimana merupakan diungkapkan dalam laporan posisi keuangan konsolidasian.

Rasio utang bersih terhadap ekuitas pada tanggal 31 Desember 2018 dan 2017 adalah sebagai berikut:

Capital Management

The primary objective of the Group's capital management is to ensure that they maintain healthy capital ratios in order to support its business and maximize stockholders value. The Group is not required to meet any capital requirements.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. The Group monitors its capital using gearing ratios, by dividing net debt with the total equity. The Group's policy is to maintain the gearing ratio within the range of gearing ratios of the other companies with similar industry in Indonesia. Net debt is calculated as total borrowings (including "current and noncurrent borrowings" as shown in the consolidated statements of financial position) less cash and cash equivalents. Total capital represents the "total equity" as shown in the consolidated statements of financial position.

Ratio of net debt to equity as of December 31, 2018 and 2017 follows:

32. Tujuan dan Kebijakan Manajemen Risiko Keuangan

Aktivitas Grup terpengaruh berbagai risiko keuangan: risiko pasar (termasuk risiko mata uang dan risiko suku bunga), risiko kredit dan risiko likuiditas. Program manajemen risiko Grup secara keseluruhan difokuskan pada pasar keuangan yang tidak dapat diprediksi dan Grup berusaha untuk meminimalkan dampak yang berpotensi merugikan kinerja keuangan Grup.

Manajemen risiko merupakan tanggung jawab Direksi. Direksi bertugas menentukan prinsip dasar kebijakan manajemen risiko Grup secara keseluruhan serta kebijakan pada area tertentu seperti risiko mata uang asing, risiko suku bunga, risiko likuiditas dan risiko kredit.

Risiko Pasar

Risiko Mata Uang Asing

Grup terpengaruh risiko nilai tukar mata uang asing yang timbul dari berbagai eksposur mata uang, terutama terhadap Dolar Amerika Serikat.

Risiko nilai tukar mata uang asing timbul ketika transaksi komersial masa depan atau aset dan liabilitas yang diakui didenominasikan dalam mata uang yang bukan mata uang fungsional. Risiko diukur dengan menggunakan proyeksi arus kas.

32. Financial Risk Management Objectives and Policies

The Group activities are exposed to a variety of financial risks: market risk (including currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

Risk management is the responsibility of the Directors (BOD). The Directors have the responsibility to determine the basic principles of the Group's risk management as well as principles covering specific areas, such as foreign exchange risk, interest rate risk, liquidity risk and credit risk.

Market Risk

Foreign Exchange Risk

The Group is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the U.S. Dollar.

Foreign exchange risk arises when future commercial transactions or recognized assets or liabilities are denominated in a currency that is not the entity's functional currency. The risk is measured using cash flow forecasts.

Risiko Suku Bunga

Risiko suku bunga Grup timbul dari pinjaman jangka panjang. Pinjaman yang diterima dengan suku bunga mengambang mengakibatkan timbulnya risiko suku bunga arus kas terhadap Grup. Pinjaman yang diterima dengan suku bunga tetap mengakibatkan timbulnya risiko suku bunga nilai wajar terhadap Grup. Kebijakan Grup adalah memelihara 30 - 40% pinjaman dalam instrumen dengan suku bunga tetap. Selama tahun 2018 dan 2017, pinjaman Grup pada suku bunga mengambang didenominasikan dalam Rupiah.

Pada tanggal 31 Desember 2018 dan 2017, saldo pinjaman dengan suku bunga mengambang adalah sebagai berikut:

2018 2017 Rata-rata Tertimbang Rata-rata Tertimbang Suku Bunga/ Suku Bunga/ Weighted Average Saldo/ Saldo Weighted Average Interest Rate Interest Rate Balance Eksposur bersih terhadap risiko Exposure to cash flow 9,40 2.212.009.771.864 8,12 1.024.665.841.763

Grup menganalisa eksposur suku bunga secara dinamis. Berbagai skenario disimulasikan dengan mempertimbangkan pembaruan posisi yang ada dan alternatif pembiayaan. Untuk setiap simulasi, pergerakan suku bunga yang sama digunakan untuk seluruh mata uang. Berdasarkan skenario ini, Grup menghitung dampak laba atau rugi dari pergerakan suku bunga. Skenario-skenario tersebut dilakukan hanya untuk liabilitas yang mewakili posisi utama yang dikenakan bunga. Simulasi dilakukan setiap kuartal untuk membuktikan bahwa potensi kerugian maksimum

Pada tanggal 31 Desember 2018 dan 2017, jika suku bunga pinjaman dalam mata uang Rupiah telah lebih tinggi/rendah sebesar 10%, dengan semua variabel lainnya dianggap tetap, laba setelah pajak untuk tahun dan tahun-tahun tersebut akan lebih rendah/tinggi masingmasing sebesar Rp 165.900.732.890 dan Rp 76.849.938.132, terutama sebagai akibat dari beban bunga yang lebih tinggi/lebih rendah pada pinjaman dengan suku bunga mengambang.

masih dalam batasan yang diberikan manajemen.

Risiko Kredit

Risiko kredit adalah risiko bahwa Grup akan mengalami kerugian yang timbul dari pelanggan atau pihak lawan yang gagal memenuhi kewajiban kontraktual mereka. Grup terkena risiko kredit dari kegiatan operasi (terutama untuk piutang usaha) dan dari kegiatan pendanaan, termasuk deposito pada bank dan lembaga keuangan, transaksi valuta asing dan instrumen keuangan lainnya.

Interest Rate Risk

The Group's interest rate risk arises from long-term borrowings. Borrowings issued at floating rates expose the Group to cash flow interest rate risk. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. The Group's policy is to maintain approximately 30 - 40% of its borrowings in fixed-rate instruments. In 2018 and 2017, the Group's borrowings at floating rate were denominated in Rupiah.

As of December 31, 2018 dan 2017, the Group has the following outstanding floating rate borrowings:

The Group analyzes its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration renewal of existing positions and alternative financing. Based on these scenarios, the Group calculates the impact on profit or loss of a defined interest rate shift. For each simulation, the same interest rate shift is used for all currencies. The scenarios are run only for liabilities that represent the major interest-bearing positions. The simulation is done on a quarterly basis to verify that the maximum loss potential is within the limit given by the management.

As of December 31, 2018 and 2017, if interest rates on Rupiah-denominated borrowings had been higher/lower by 10%, with all other variables held constant, profit after tax for the years would have been lower/higher by Rp 165,900,732,890 and Rp 76,849,938,132, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

Credit Risk

Credit risk is the risk that the Group will incur a loss arising from the customers or counterparties which fail to fulfill their contractual obligations. The Group is exposed to credit risk from its operating activities (primarily for trade accounts receivable) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Manajemen berkeyakinan bahwa tidak terdapat konsentrasi risiko kredit yang signifikan. Grup mengelola dan mengendalikan risiko kredit melalui transaksi yang dilakukan hanya dengan pihak yang telah dikenal dan layak kredit menetapkan kebijakan internal untuk proses verifikasi dan otorisasi kredit, dan secara teratur memantau kolektibilitas pinjaman dan piutang untuk mengurangi eksposur kredit macet.

Tabel di bawah ini menunjukkan eksposur Grup terkait dengan risiko kredit pada 31 Desember 2018 dan 2017:

Management believes that there is no significant concentration of credit risk. The Group manages and controls the credit risk by dealing only with recognized and credit worthy parties, setting internal policies on verifications and authorizations of credit, and regularly monitoring the collectibility of loans and receivables to reduce the exposure to bad debts.

Grup menggunakan konsep rating kredit didasarkan pada kelayakan kredit keseluruhan peminjam dan pihak lawan, sebagai berikut:

1. Tingkat standar

Peringkat yang diberikan kepada debitur serta pihak ketiga yang memiliki kapasitas yang sangat kuat untuk mampu memenuhi kewajiban mereka.

2. Tingkat substandar

Penilaian yang diberikan kepada debitur serta pihak ketiga yang memiliki kapasitas di atas rata-rata untuk mampu memenuhi kewajiban mereka.

Pada tanggal 31 Desember 2018 dan 2017, manajemen menilai aset keuangan yang belum jatuh tempo dan tidak mengalami penurunan nilai pada tingkat standar.

Risiko Likuiditas

Risiko likuiditas adalah risiko kerugian yang timbul karena Grup tidak memiliki arus kas yang cukup untuk memenuhi liabilitasnya.

The Group uses a credit rating concept based on the borrowers and counterparties' overall credit worthiness, as follows:

1. Standard grade

Rating given to borrowers and counterparties who possess strong to very strong capacity to meet their obligations.

2. Substandard grade

Rating given to borrowers and counterparties who possess above average capacities to meet their obligations.

As of December 31, 2018 and 2017, the management grades its financial assets that are neither past due nor impaired as standard grade.

Liquidity Risk

Liquidity risk is a risk arising when the cash flow position of the Group is not enough to cover the liabilities which become due.

Dalam pengelolaan risiko likuiditas, manajemen memantau dan menjaga jumlah kas dan setara kas yang dianggap memadai untuk membiayai operasional Grup dan untuk mengatasi dampak fluktuasi arus kas. Manajemen juga melakukan evaluasi berkala atas proyeksi arus kas dan arus kas aktual, termasuk jadwal jatuh tempo utang, dan terus-menerus melakukan penelaahan pasar keuangan untuk mendapatkan sumber pendanaan yang optimal.

Berikut adalah jadwal jatuh tempo liabilitas keuangan berdasarkan pembayaran kontraktual yang tidak didiskontokan pada tanggal 31 Desember 2018 dan 2017: In managing the liquidity risk, management monitors and maintains a level of cash and cash equivalents deemed adequate to finance the Group's operations and to mitigate the effects of fluctuation in cash flows. Management also regularly evaluates the projected and actual cash flows, including maturity profiles, and continuously assesses conditions in the financial markets for opportunities to obtain optimal funding sources.

37. Standar Akuntansi Keuangan Baru

a. Diterapkan pada Tahun 2018

Grup telah menerapkan Pernyataan Standar Akuntansi Keuangan (PSAK) baru dan amandemen berikut, namun tidak mengakibatkan perubahan substansial terhadap kebijakan akuntansi Grup dan tidak memiliki dampak signifikan terhadap laporan keuangan konsolidasian:

PSAK

1. PSAK No. 2, Laporan Arus Kas: Prakarsa Pengungkapan

Dampak penerapan dari standar ini adalah penambahan pengungkapan rekonsiliasi liabilitas konsolidasian yang timbul dari aktivitas pendanaan (Catatan 35).

 PSAK No. 46, Pajak Penghasilan tentang Pengakuan Aset Pajak Tangguhan untuk Rugi yang Belum Direalisasi

b. Telah Diterbitkan namun Belum Berlaku Efektif

Ikatan Akuntan Indonesia telah menerbitkan Pernyataan Standar Akuntansi Keuangan (PSAK) baru, amandemen PSAK dan Interpretasi Standar Akuntansi Keuangan (ISAK) baru yang berlaku efektif pada periode yang dimulai:

1 Januari 2019

ISAK

- ISAK No. 33, Transaksi Valuta Asing dan Imbalan Di Muka

- PSAK No. 71, Instrumen Keuangan: Fitur Percepatan Pelunasan dengan Kompensasi Negatif

37. New Financial Accounting Standards

a. Adopted During 2018

The Group has adopted the following new and amended Statements of Financial Accounting Standards (PSAKs), which did not result in substantial changes to the Group's accounting policies and had no material effect on the consolidated financial statements:

PSAK

1. PSAK No. 2, Statements of Cash Flows: Disclosure Initiative

The effect of the adoption of this standard is the inclusion of a reconciliation of consolidated liabilities arising from financing activities (Note 35).

 PSAK No. 46, Incomes Taxes: Recognition of Deferred Tax Assets for Unrealized Losses

b. Issued but Not Yet Effective

The Institute of Indonesia Chartered Accountants has issued the following new Statement of Financial Accounting Standards (PSAK), amendments of PSAKs and new Interprestations Accounting Standard (ISAKs) which will be effective for annual period beginning:

January 1, 2019

ISAK

- ISAK No. 33, Foreign Currency Transaction and Advance Consideration
